

Product information

VITOCOLL 584/05B09

Transfer tape based on a double-sided self-adhesive polyester film. One side has high and the other side low adhesive strength.

Product composition

- Adhesive**, modified acrylate, high adhesive strength
- Carrier**, polyester film, 15 μm
- Adhesive**, modified acrylate, low adhesive strength
- Liner**, siliconised paper, white

Application

VITOCOLL 584/05B09 was designed for the self-adhesive finishing of products with low adhesive strength and is suitable for indoor and outdoor applications. The side with high adhesive strength is used for the adhesion of felt, film, paper, elastomer and tissue.

Product benefit

- the side with low adhesive strength can be removed from most surfaces like wood, PVC and metal without leaving any residue
- compatible with acrylic glass

Technical data and product properties

thickness	0.09 mm	
peel adhesion, low adhesive strength acc. to DIN EN 1939:1996	stainless steel at 20 °C	7 N / 25 mm
peel adhesion, high adhesive strength acc. to DIN EN 1939:1996	stainless steel at 20 °C	17 N / 25 mm
shear adhesion, high adhesive strength acc. to DIN EN 1943:1996	stainless steel at 20 °C	15 N / 625 mm ²
temperature resistance	-40 °C to 90 °C	
application temperature	15 °C to 30 °C	
compatibility with acrylic glass	yes	

Processing

The most important processing parameters and information on cleaning are listed in our Information on Processing Adhesive Tapes.

Storage and shelf life

12 month after receipt of goods, when stored at 18 °C and 60 % relative humidity protected from sunlight, in original packaging

Special Information

The data and technical information presented are characteristic or average data. All advices are given to the best of our knowledge. You are kindly requested to conduct your own tests to determine the suitability of our product for your application. Our General Conditions answer any questions on guarantees and liabilities for these products unless other legal regulations apply.
